

# 10TX

## SIGNAL DISTRIBUTION, EVOLVED

Months of planning, and you're live. Once it's finished, the moment is gone. You deserve a signal distribution team that allows you to capture, distribute and monetize **more** of that event, from **more** angles, with **more** sponsorship opportunities, and to deliver **more** content to even **more** takers in every format possible.

Achieving that requires evolution - a company with a new way of approaching signal distribution. You need innovation times 10. That's why we started 10TX.

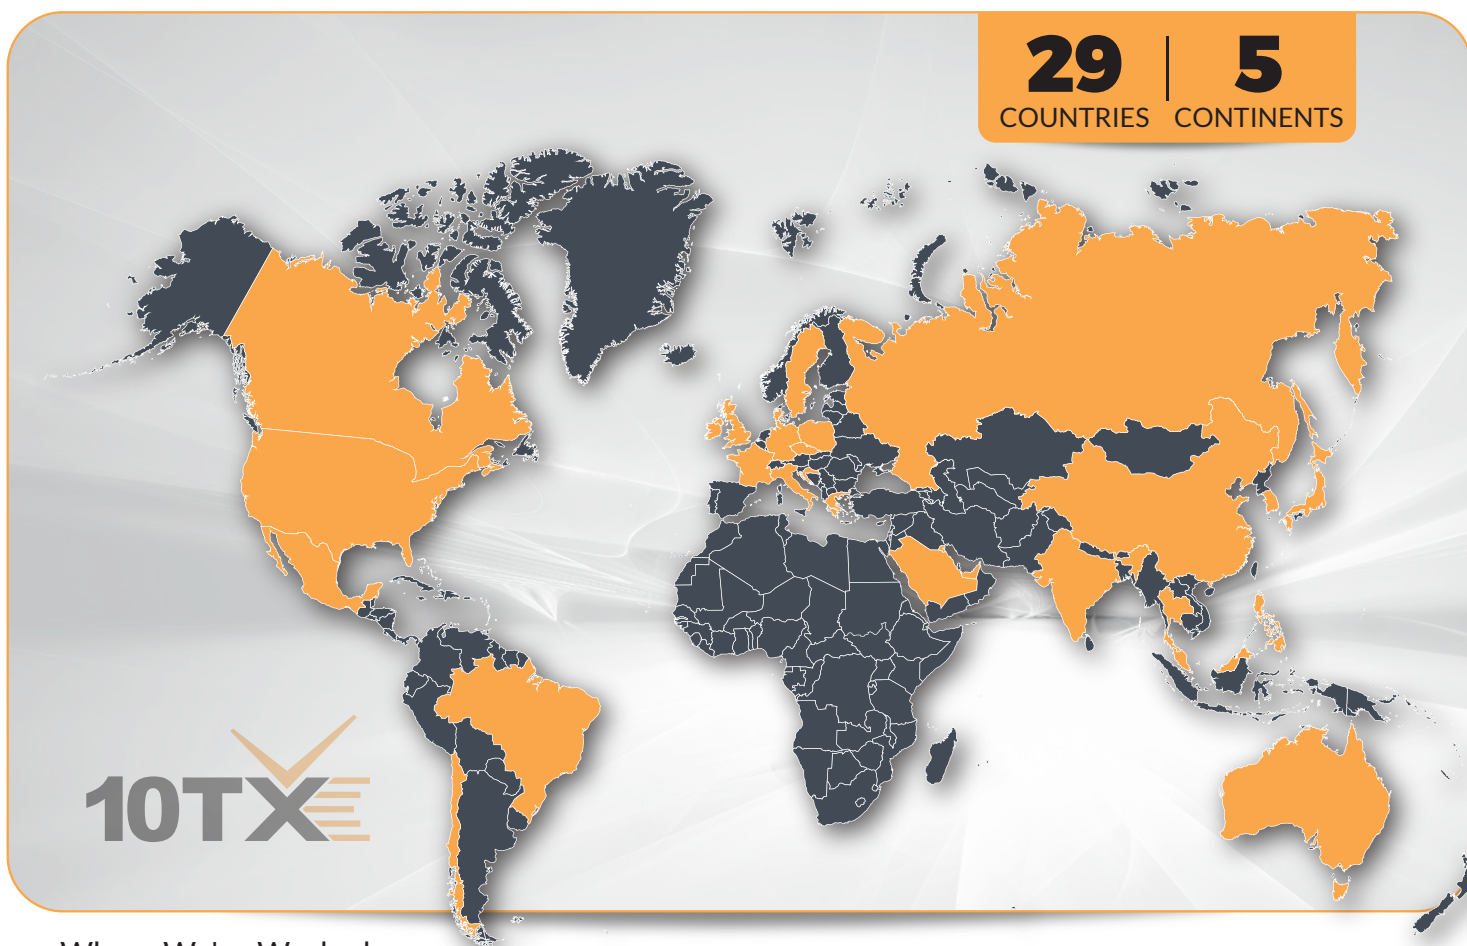

### THE 10TX ADVANTAGE

- Encoded signals can be delivered via fiber, satellite, and public internet.
- In-house creation of signal transport hardware and software.
- Full visibility of worldwide program signals: All feeds on the network can be monitored from anywhere (Including: encoded signals, IP streams, and satellite return feeds from all regions of the world).
- Multiple channel encoding and signal transport on our private network.
- New capabilities to monetize feeds and deliver additional value (main feed as well as ancillary feeds, extra content) that were once cost-prohibitive.
- Convert feeds and deliver to limitless takers in a variety of digital formats.
- With Nextologies edge devices deployed, engineering can remotely analyze the technical data for transport streams from origination to destination.
- Custom, enhanced workflows between venues and remote client sites utilizing data connections over Nextologies edge devices.

## 10TX IS DISRUPTING THE LIVE SIGNAL DISTRIBUTION INDUSTRY BY

- Integrating Nextologies' proven signal transport technologies.
- Leveraging the team's 25+ years experience by integrating new technologies with legacy systems to assist customers as they migrate to digital IP platforms.
- Owning the network, worldwide datacenter and teleport collocations, and designing and building the technology used in the signal encoding, allowing for a more robust and reliable delivery at a lower cost.
- Integrating new innovations, developing content enhancing apps, and providing solutions with a proven track record of signal delivery.

Where We've Worked

If your organization is an established content provider, production company, network, or transmission provider, and is looking for avenues to expand your signal delivery offerings, contact Keith Valeri to find out more: [KeithV@10TX.com](mailto:KeithV@10TX.com).
