Remote Production:
SOLVED

Create richer content, and more of it, while spending less of your production budget. NexToMeet is an instant web/mobile to SDI video network, accomplished by combining home-grown internet protocol with IP stream's routing capability to allow production teams to film interviews in any location with an iPhone or iPad webcam, and deliver that signal directly to SDI, no workarounds required.
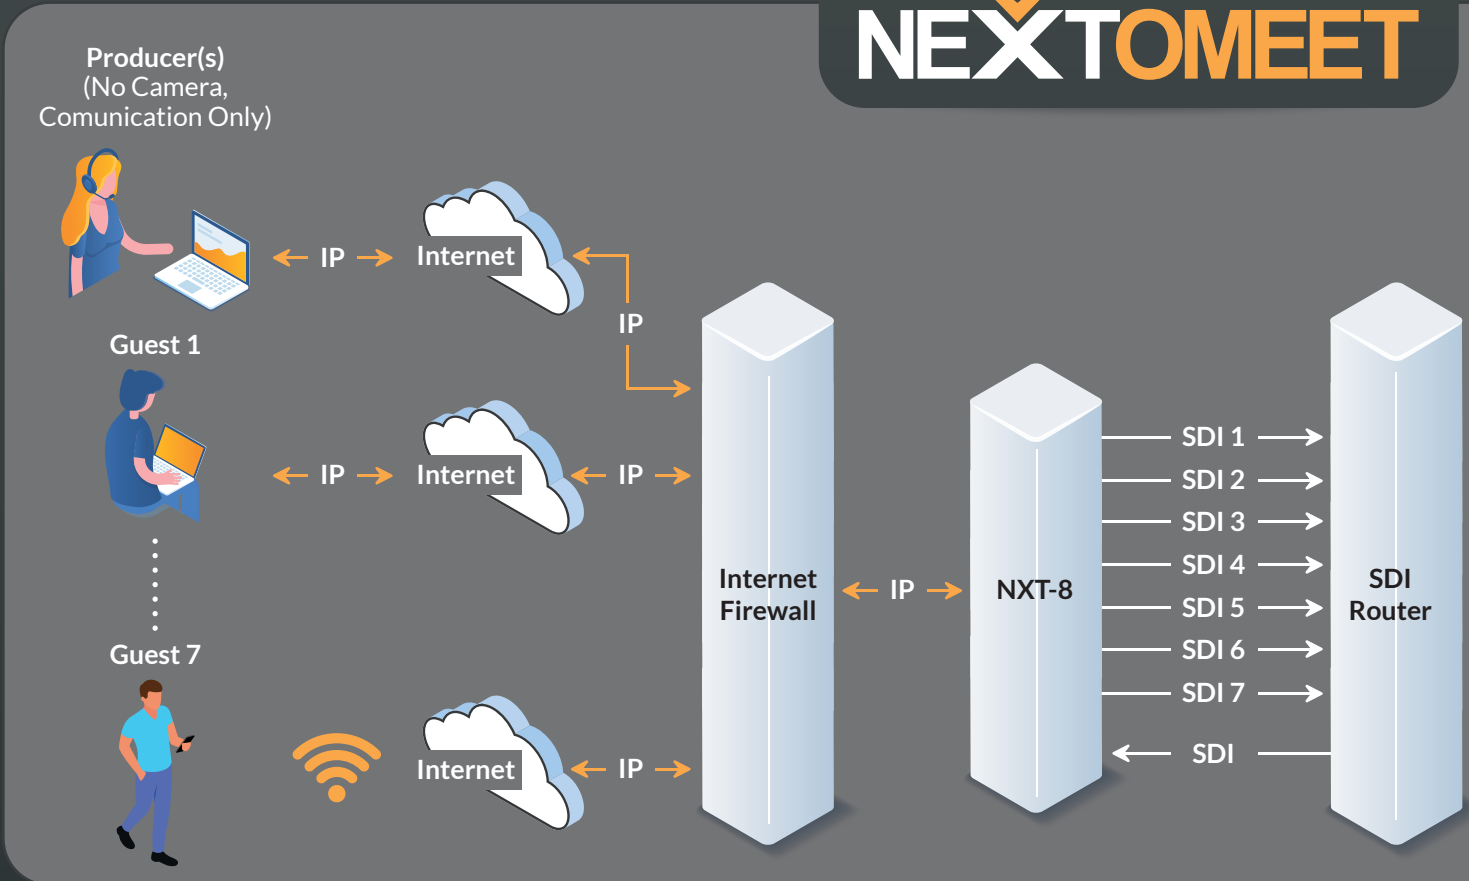

NEXTOMEET

REMOTE MEETING PORTAL DESIGNED FOR PRODUCTION

- Remote Multiple Guests
- Multiple Producers
- SDI input/output
